

ExecHealth⁺

Ottawa, March 30, 2009 – ExecHealth Inc., Ottawa’s leading provider of medical and healthcare services to corporations, executives and professionals is pleased to announce that it will be opening a new, state-of-the-art executive medical facility in Ottawa’s downtown core.

“The company has grown significantly since we began in 2005. We felt that it was time to expand our services to meet the multifaceted needs of our clients and build a facility specifically designed for this purpose” said Sanjay Shah, President and CEO.

The new multidisciplinary medical clinic will be located at 116 Albert St., in the heart of Ottawa’s business and financial district. “The new location is ideal. It will allow many of our existing clients the convenience of walking to our clinic for medical appointments, prescription renewals and other health services. It is also conveniently located for clients from Gatineau and our diplomatic clients located in Rockcliffe.”

In addition to comprehensive health assessments; the new facility will offer expanded medical and health care services – including a personal physician service. Personal physicians will be limiting the size of their practices to ensure that each client receives the highest level of care including punctual, unhurried appointments and proactive management of health issues. Also a medical concierge service will expedite specialist appointments, imaging (such as MRIs) and surgeries through private channels when public wait times are too long.

The ExecHealth medical staff will be complemented by an onsite team of allied health professionals including physiotherapists, nutritionists and other health care providers, each coordinating their efforts under the supervision of personal physicians.

“The physicians will be limiting the size of their practices, allowing them to provide a very high level of care to each client.” said Mr. Shah. “Enrollment will be offered to existing ExecHealth clients first. Any remaining spots will be made available on a first-come basis”.

The new executive medical clinic is expected to begin operations on June 1, 2009.

About ExecHealth Inc.

ExecHealth is an Ottawa-based health management company that specializes in keeping its clients healthy through preventative and ongoing medical care programs. Its Comprehensive Health Assessments are designed to proactively identify and address preventable diseases and other health issues before they become serious. These assessments, which include detailed diagnostic testing, go far beyond the standard physical examination and are designed for the early detection and prevention of diseases such as cancer and heart disease.

With an emphasis on service, health assessments are conducted in a single morning by a multidisciplinary team of medical doctors, nutritionists, nurses, physiotherapists and fitness experts. Clients are provided with a written health report and action plan to ensure that appropriate lifestyle modifications are made.

Corporations enlisted the services of ExecHealth to ensure their key employees remain healthy and performing at their best. These firms have also found ExecHealth’s program to be a powerful retention and recruitment tool in a competitive environment.
